

QUANTUM EDGE®

Enhanced Profile with Eco-Base®

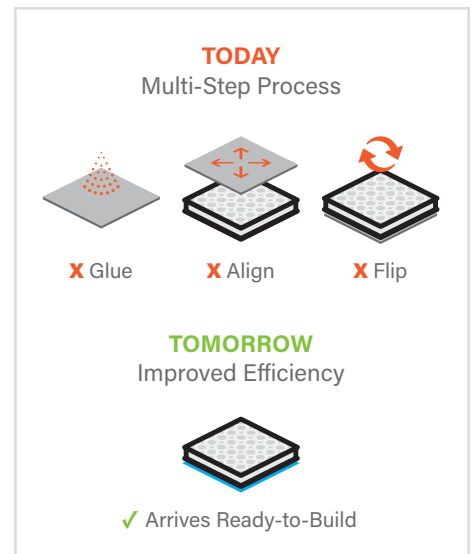

BeddingComponents.com

Developed with a more mindful approach, this new product still features Quantum Edge® coil side rails with Caliber® steel springs at the head and foot, but with an integrated pre-attached base layer that replaces base foam. To maintain mattress profile, coil height is increased (+1"). This unit arrives ready-to-build, which improves throughput, lessens labor constraints, reduces inventory, and yields sustainable benefits.

- **Eco-Base®** – 100% polyester non-woven fibers enhanced with a starch binder; weighs less than 1 lb and less than 1 mm thick. Improved durability compared to commodity poly base foam
- **Improved Compression Recovery** – compared to commodity poly foam
- **Better Shape Retention** – resulting in less size variation when handling
- **Improved Edge Performance**
- **Promotes Sustainability** – 80% less petro-chemical contents per unit, which means every 200 queen units conserves 80 gallons*
- **Packable and Shippable** – can be compressed, folded, and rolled

Product Name	Coil Height	Coil Count*	Center ILD	Head/Foot ILD	Edge ILD
Quantum Edge® Enhanced Profile with Eco-Base®	9"	800	--	--	--

Sizes: Twin, Twin XL, Full, Queen*, King, Cal King

*Comparing 800 QPE 8" with base foam to 800 QPE 9" with Eco-Base® (base foam comparison is 1.0" 1.8 lb commodity poly base foam in 60" x 80" size)
