

QUANTUM EDGE® ELITE EVO™ with Eco-Base®

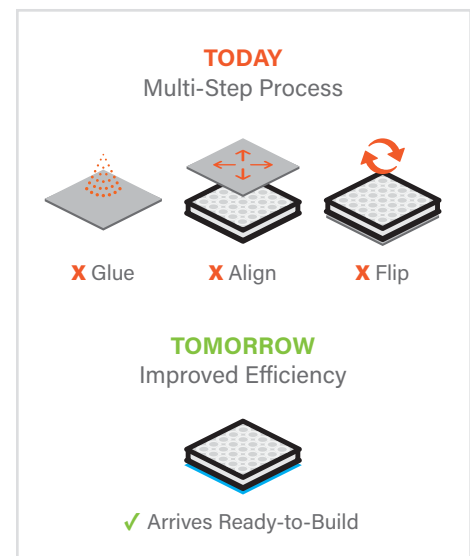

Leggett & Platt®

BeddingComponents.com

Quantum Edge® Elite EVO™ forms a frame around our Bolsa® unit, providing superior edge support, delivering a consistent sleep surface, and reduces the feeling of roll-off.

- **Eco-Base®** – 100% polyester non-woven fiber.
 - Improved durability and compression recovery compared to commodity poly base foam.
 - Promotes Sustainability – 80% less petro-chemical contents per unit, which conserves 80 gallons for every 200 Queen units*
 - Better shape retention – less size variation when handling.
- **Quantum Edge® Elite EVO™ Coils** – A reinforced perimeter, made up of narrow-diameter Quantum® coils, that frames the sides, delivers a consistent sleep surface, and reduces feeling of roll-off.
- **Bolsa® EVO™ Coils** – Provide an even surface that absorbs partner movement and prevents sleepers from rolling together.
- **Next-Generation Innersprings** – ComfortCore® EVO™ (Elevated Value Objective) delivers a higher value proposition through advanced engineering and mindful use of wire.
- **Pre-Compressed Coils** – Create a firm surface that makes the unit more responsive to body movements.
- **Stress-Relieved Wire** – Holds its shape and provides a durable, consistent sleep surface.
- **Packable and Shippable** – Can be compressed, folded, and rolled for easier handling in a more manageable size.
