

HI-LOW®

Create comfort zones in a variety of layouts with Hi-Low®. This variable-height coil system with cavity-filled zoning creates spaces for micro-coils, like Softech®, or other comfort layers, like memory foam and gel.

- Traditional zoning option features extra support at the shoulders and hips.
- Offer a distinct difference in firmness, density, and spring action for exceptional comfort.
- Boost coil counts by layering low-profile coils.
- Limitless opportunities for creating unique comfort and feels.

ComfortCore® coils feature heat-treated, stress-relieved wire that holds its shape and provides a durable, consistent sleep surface. The wire flexes and conforms to the individual contours of the body for superior comfort and reduced partner disturbance.

Innersprings sleep up to 28% cooler than foam.*

Unit Coil Counts
