

NanoCoil® performance comfort layer is proven to last longer than foam. Available in a variety of layering options, NanoCoil increases coil counts while delivering a unique, responsive feel that's built to last.

- Proven to resist sagging and settlement.
- Conforms to the individual contours of the body for a personalized feel.
- Offers a durable, long-lasting sleep surface in a variety of coil count configurations.

ComfortCore® coils are slightly compressed when placed into the fabric encasement. This action firms the coils, making the sleep surface more responsive to body movements.

Innersprings sleep up to 28% cooler than foam.*
